NEVER STOP LEARNING
We’ll never stop learning, because life never stops teaching. That’s why we join you as partners in making higher education inspirational and accessible for students. Thank you for all you do, as you invest in each of your students and their futures. We applaud you. Hear from our learners—resilient problem solvers—how education has empowered them to rise.

IN THE NEWS...
Always with eyes on the future, UW-Green Bay’s Cofrin School of Business opened the Willie D. Davis Finance and Investment Lab in early 2022. Business students gain experience using cutting-edge professional terminals to trade with real money and join experts to discover what’s next for finance and investment trading.

As UW-Green Bay’s nursing program prepares the next generation of medical professionals, the University has invested in a new Nursing Skills Center where students use technology and practice clinical skills in hands-on simulations. Get an inside look at the labs.

The first cohort of Rising Phoenix students completed their Associate of Arts and Sciences degrees in May of 2022, the same time they received their high school diplomas. Rising Phoenix is a groundbreaking collaboration between school districts and UW-Green Bay, providing students with a blend of dual enrollment courses and ongoing student success coaching, allowing students to complete an AAS while still in high school. Learn more and connect with the program at uwgb.edu/rising-phoenix.

Continuing a commitment to making higher education affordable for all, learn more about costs, scholarships and more at uwgb.edu/cost.

SIX YEARS AS THE FASTEST-GROWING UW SCHOOL

• Bachelor’s degrees at all 4 campus locations and online
ADVISING MATTERS

From our Director:
“There are many paths students take in their education and to UW-Green Bay. As options grow for students to earn credits in high school or with technical colleges, we encourage students to connect with an admissions counselor early and often to stay on track to their goals in the most streamlined way possible.”

—Rachele Bakic
Executive Director of Admissions

SUPPORTING STUDENTS TOGETHER

Students are remarkable—resilient, striving and accomplished. It is our honor to partner with your school in support students toward their education goals.

• **We’re coming to you**—Admissions counselors will be in touch to schedule visits to your school, to meet students right where they are.

• **Hit the road**—Your students are always more than welcome on our campuses, for individually scheduled visits with the family or through school field trips. uwgb.edu/visit

• **Class is in session**—With a full menu of Academic and Career Planning presentations, our admissions counselors are fully equipped to present for your classes. We offer options on topics from application essays and admission review to scholarship searching. We are happy to provide custom presentations as well.

• **Lean on us**—We believe every student can be successful with the right support. With a strong foundation of academic, social and identity-based support services, UW-Green Bay is ready to foster your students to success.

MEET THE ADMISSIONS TEAM

Put a face to the name! Our admissions counselors are always ready to answer your questions. Find the counselor that serves your area below.

“**I love the natural, eco-friendly feel of the campus. The arboretum, the walking trails—it’s like going to college in a state park! I also liked the small class size and the personal experience you get with your professors. They always let me know about classes, internships and workshops that are available for me.”**
